

WORK ELEMENT 8 - COMPREHENSIVE REVIEW/EVALUATION OF MAJOR REGIONAL TRANSPORTATION ROUTES

PURPOSE:

During FY 2006, the ADD completed a comprehensive review of the major highway networks, major traffic generator routes and access routes to such networks from the major traffic generators and freight sites within the region. The condition of these roadways was evaluated based on the data available and needs. Any significant needs were documented and if those needs were being addressed through either the Six-Year Highway Plan or an Unscheduled Project List Need, this was noted. However, if the need had not been addressed, then the ADD was to prepare a new Project Identification Form (PIF) or revise an existing PIF to address the needs that were noted. This comprehensive review was completed by March 30, 2006 and should be revised as may be requested per any comments received from the Cabinet during FY 2008. This report should be included in the Regional Concept Plan.

FY 2008 TASKS:

- Any need, identified through this review and analysis, and not previously addressed through a Six-Year Highway or Unscheduled Project List project should be documented with a Project Identification Form (PIF) or, as needed, revise a current UPL Project Identification Form. A revised list should be submitted to the Cabinet showing the numbers of new UPL projects developed to address the needs identified through this evaluation process.
- Any new or revised PIFs as a result of this effort should have been submitted to the appropriate Highway District Office, complete with photographs and map, during Fiscal Year 2007. Access to the multimodal and/or modal facilities, such as airports, riverports, rail facilities and major trucking terminals, or to a major traffic generator should be noted in the Problem Statement as part of the explanation and justification of the need to address this problem.
- Maps of Major Traffic Generators should be updated as needed, as a result of the work completed during this comprehensive review of the region.
